Course description	Sociolinguistics is an interdisciplinary science that views language in social context and attempts to explain the complexity of the relationships between language, culture and society. Students are acquainted with basic sociolinguistic phenomena through readings of literature relevant for a particular area of research. Students identify, interpret and analyze the phenomena on the basis of selected readings. Students develop critical thinking towards basic sociolinguistic areas of research and towards methods used to conduct such research. Furthermore, students are acquainted with traditional and contemporary theoretical frameworks within which such phenomena are analyzed.

Form 1.3.2. Syllabus

limited to:

- various forms of fraud such as the use or possession of books, notes, data, electronic gadgets or other aids during examinations, except when permitted;

-various forms of forgery such as the use or possession of unauthorised materials during the exam; impersonation and attendance at exams on behalf of other students; fraudulent study documents; forgery of signatures and grades; falsifying exam results."

All forms of unethical behaviour will result in a negative grade in the course without the possibility of compensation or repair. In case of serious violations the *Rulebook on Disciplinary Responsibility of Students at the University of Zadar* will be applied.

In electronic communications only messages coming from known addresses with a first and a last name, and which are written in the Croatian standard and appropriate academic style, will be responded to.

This course uses the Merlin system for e-learning, so students are required to have an AAI account.
